For technical reasons connected with the reproduction and print manufacture, these colours may not exactly match the actual paints.

Achieving the perfect finish for exterior walls

- First of all check the condition of your walls. Look for cracks, mould or surface imperfections, such as powdery or chalky surfaces.
- Brush off any loose particles or flaky paint to ensure the masonry paint will bond to the surface.
- Where necessary, treat the surface as directed, using Granocryl by Leyland Fungicidal Wash and/ or Granocryl by Leyland Stabilising Solution.
- Do not paint when rain is imminent or when the temperature is below 10°C.
- Safety first - ensure adequate access is available. If required use a scaffold tower or extension ladder.
- For product specific information please check the back of pack copy.
