

JOHNSTONE'S TRADE COLOUR COLLECTION

INSPIRATION & COLOUR GUIDE

PPG Voice of Colour is an exclusive palette that matches the quality of Johnstone's Trade's paint products with inspiring colour selection. The PPG global colour experts have created a colour palette that will both inspire and match your project vision.

The Johnstone's Trade colour guide has been created to help advise and guide you on your colour selection journey.

The PPG 2022 Colour of the Year and trends will help keep your project relevant, whilst the 60-30-10 principle will guide you towards building simple and harmonious colour schemes.

The colour strips at the back of the card provide you with real paint samples to show exactly how each colour will look. This refined selection of the most popular colours will make it quick and easy to choose the right colour for your project.

Donna Taylor
PPG Principal Technical
Colour Consultant

The PPG Voice of Colour palette is only available in Johnstone's Trade paints and has been developed based on quality, whilst ensuring that the best possible colour accuracy is aligned with lasting decorative paint performance.

“Helping and supporting customers with their colour selection process is vital so that they have the confidence to build their own colour stories. People are growing tired of the stark, neutral palettes of yesterday and are opting for colour in all forms. Call it rebellion, but we are certainly here for the resurgence of optimistic colours to guide us into a new era of home and commercial design.”

PPG 2022 COLOUR OF THE YEAR FOCUSES ON **HOPE AND NEW BEGINNINGS**

2022
Colour of the Year
Olive Sprig
PPG1125-4

Resilience, the need for connection and inspiration from nature, are recurring themes for this year's trends.

PPG's Colour of the Year Olive Sprig (PPG1125-4) is a relaxed, but enticing, elegant and highly adaptable grey-green, representing regrowth in a post-pandemic world, mimicking nature's resiliency.

A versatile colour that lives well inside or outside, Olive Sprig blends in with nearly any environment.

DISCOVER **HOW TO USE COLOUR** IN DIFFERENT SHAPED ROOMS

LOW CEILINGS

Help make your room feel more open through using colour to lift the ceiling by painting it a lighter shade of the wall colour.

TALL ROOMS

High ceiling rooms can be made to feel more comfortable by painting the ceiling in a mid or dark colour, and the walls painted in a lighter shade of the ceiling colour.

Colour can help change the perception of a room layout. Use the simple guide below to help find the best use of colour to maximise your project's potential.

SMALL, CONFINED SPACES

Small and dark rooms can be transformed through the use of off-whites and lighter shades, with an accent colour on one wall.

NARROW ROOMS

Transform the shape of a long room by using a dark feature wall colour on the furthest facing wall to draw attention away from the shape of the room.

	Commercial White PPG1025-1

A **SIMPLE METHOD** TO CREATE A COLOUR SCHEME

With such a variety of colours available, choosing the right colours for the perfect scheme can often feel like an overwhelming task. The 60-30-10 principle is a simple and practical rule to help create the ideal palette for any project. The colour strips in the back of this colour card will support you in your colour selection process

60% MAIN COLOUR

This will cover approximately 60% of your room. These are the main walls and even the ceiling too.

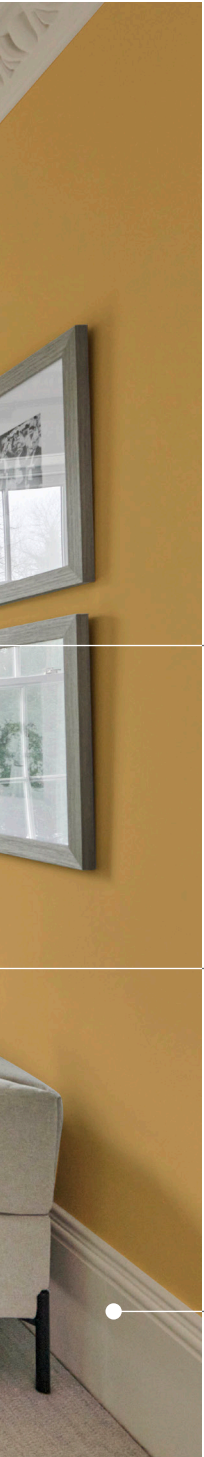

30% FEATURE COLOUR

This is approximately 30% of your room. This should be a feature wall colour and provides balance so choose a small wall that would brighten up your room once painted.

10% ACCENT COLOUR

This is approximately 10% of your room and can be interior wood, trim or doors, or even accessories such as cushions, curtains or your favourite rug.

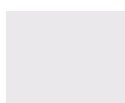

CREATE A **LIGHT & CALM** SCHEME

USE 60-30-10 TOP DOWN

If you're looking to create a soft and soothing feel to your project then use the 60-30-10 rule from the top to the bottom of the colour strips in the back of this colour card.

BRIGHTEN UP *YOUR EXTERIOR PROJECT*

Developed specially for Johnstone's Trade masonry paints and renders, we have a specially selected range of Voice of Colour colours that are perfect for brightening up exteriors.

To ensure Johnstone's Trade exterior coatings and systems retain their fresh look for longer, all of the selected colours in the Voice of Colour collection have a high resistance to U.V. light and excellent colour retention.

The Voice of Colour colours marked with ☀️ may fade with use on exterior masonry.
